#### **Presenter: Lewis Trigger**

In an hour Lewis will convey the central themes of Constraint Innovation through a personal story from his officer training with the Israeli Air Force.

The story revolves around a desert training exercise in which the “Constraint” is the slowest trooper, “Herbie”.

Herbie’s story is the story of every management system where ultimately the outcomes of all Supply Chains and organizations are dictated by how we manage our Constraints, our “Herbies”.

Lewis uses the story of “Herbie” to illustrate how the Constraint Innovation fundamentals are leveraged to achieve a mutually beneficial outcome.

Lewis Trigger is a recognized international expert in Constraint Innovation. Australian born, Israel resident, Lewis is an industrial engineer (MBA, MSc), with over 25 years of experience in applying Theory of Constraints (TOC) within the Israeli military’s maintenance; engineering and logistics systems, within government and private industry. In addition he is a senior lecturer in leading academic institutions including the prestigious M.B.A program at the University of Tel Aviv.

Over the last 16 years, Lewis has shared his expertise through his workshops to many leading organizations in Australia such as Newcrest Mining, Visy, Arnott’s, Schweppes, The Australian Submarine Corporation, Thales, Adelaide Health Service, the Spotlight Retail Chain, Dairy Farmers, Coopers Brewery, Government agencies at a Federal, State, and Local level.
