Full Auto: A tour of Victoria International Container Terminal

Thursday, 22 February 2018

Innovative, sustainable and setting a new bench mark for port automation – VICT is proud to be Australia's first fully automated container terminal.

Victoria International Container Terminal (VICT) won the tender to build and operate the brand new container terminal in May 2014 and welcomed its first vessel in April 2017. Situated in the Port of Melbourne at Webb Dock East, VICT's unique location on the bay side of the port is unhindered by the West Gate Bridge. This means for the first time, larger vessels of 8000+ TEU can access the port for service by VICT.

VICT is owned by International Container Terminal Services, Inc. (ICTSI) and the project marks ICTSI's first entry into Australia. VICT utilises the best-proven technologies and innovations to deliver fully-automated operations from ship to shore and increases the ports capacity to an additional 1 million TEUs per year.

VICT has achieved an ISCA Leading Rating for both its Design and Build and has been recognised for its dedication to innovation in 2017 by winning the SMART Infrastructure Project Award at the National Infrastructure Awards. As well as winning the award for Supply Chain Innovation & Technology at the 2017 DCN Australian Shipping and Maritime Awards.
