There are many ways supply chain professionals can take their businesses to the next level.

Join SCLAA, as we tour and experience Zebra Technologies recently revamped innovation centre for an exclusive demonstration on how edge technologies are enabling visibility in the supply chain.

Understand how companies can decrease the impact of disruptions on the supply chain with technologies that enables visibility and reduces business risk for better decision making.

Step outside your comfort zone to learn how customer expectations evolves across different industries. From warehouse to store, from stock room to shelf, from blood bank to laboratory – discover how the supply chain is being redefined by different industry with a hands on demonstration.

Especially designed to capture insights – Zebra's experience centre is a futuristic vision into what technology is available in the coming years.
