Parking: Public Parking is close to the venue
(CPP Council House, Wilson Kings Complex)

**REGISTER
NOW**

Light Refreshments will be served

Within the next two decades we must reimagine, re-invent and rebuild our global economy with the goal to decentralise a prevailing, and predominantly, centralised architecture that ultimately cannot prevail.

Never in history has an opportunity so massive presented itself on a timeline so compressed and been driven by an imperative so existential.

This presentation will explore what the world might look like if we succeed, what will happen to us if we fail and what will this mean for our Supply Chains?

All are welcome to the final format SCLAA WA event of 2018. Please come and join like-minded people, young professionals and experienced managers at the next SCLAA event.

Rowan Fenn CEO of rise-x.io, a company that is utilising blockchain technology to overcome today's and tomorrow's industrial challenges.

Registrations close: 3 December 2018
