

OPTIMISING INTERNATIONAL TRADE LOGISTICS

CREATING ADAPTIVE AND FLEXIBLE TRADE PROCESSES

The Manufacturing and Logistics Industry is undergoing significant changes in adopting the best practices in the Asia – Pacific region. Firms are constantly trying to innovate and transform their supply chain processes.

This workshop is an opportunity to share the recent developments in the global transportation industry. There will also be a review of the current packaging operations and associated regulations.

Topics to be covered include, but are not limited to:

- > Global distribution Operations
- > Role of contracts in the international movements
- > International packaging rules & important regulations
- > Importance of documentation in the global transportation
- > New developments in marine container planning
- > Multi Modal - Planning and Scheduling

This is the first event of the strategic supply chain management series initiated by Dr Renu Agarwal Associate Professor, Operations and Supply Chain Management from UTS Business School.
